

JAPAN, KOREA HOLD TALKS ON COOPERATIVE GEODETIC OBSERVATION

ROKOHA Incheon Headquarters

Japanese and Korean geodetic experts met in Incheon, Republic of Korea, on 14 July 1994, to discuss a cooperative geodetic observation using GPS.

The meeting was kindly arranged by the Office of Hydrographic Affairs, Republic of Korea, at its Incheon Headquarters, and attended by:

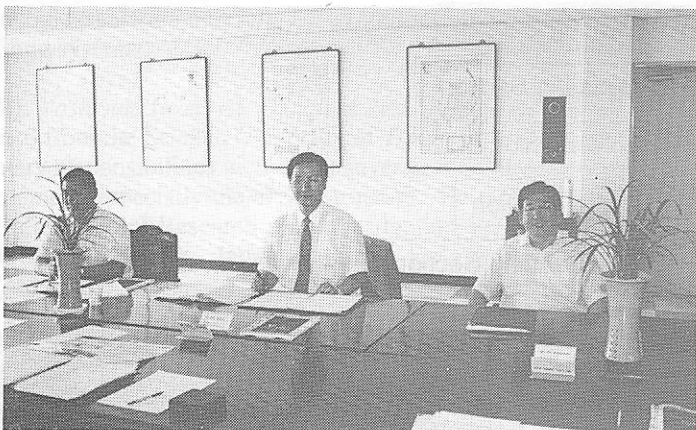

From Office of Hydrographic Affairs, Republic of Korea

- Mr. Sung, Baik-Sik, Director of Nautical Chart Division,
- Mr. Lee, Sang-Eop, Deputy Director of Nautical Chart Division,
- Mr. Lee, Byung-Sub, Deputy Director of Survey Division
- Mr. Kim, Jeong-Ki, Nautical Chart Division,
- Mr. Kim, Ok-Soo, Nautical Chart Division, and

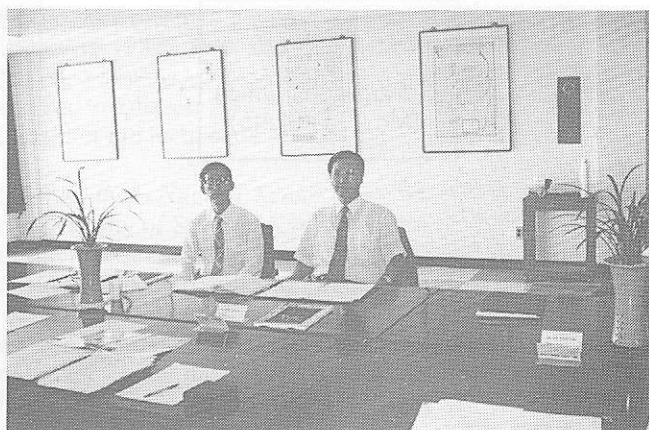

From Hydrographic Department of Japan

- Mr. Teruo Kanazawa, Deputy Director, Geodesy and Geophysics Division

It was agreed that a joint observation would be carried out at Simosato Hydrographic Observatory of J.H.D. and Tusima in Japan, where the coordinates are already determined with Satellite Laser Ranging (SLR) system, and Incheon and Pusan in Korea in November 1994. The joint observation will be made by using GPS simultaneously to connect their respective geodetic systems.
