

JHD, JICA studying feasibility of ENC production technology to be transferred to NAMRIA

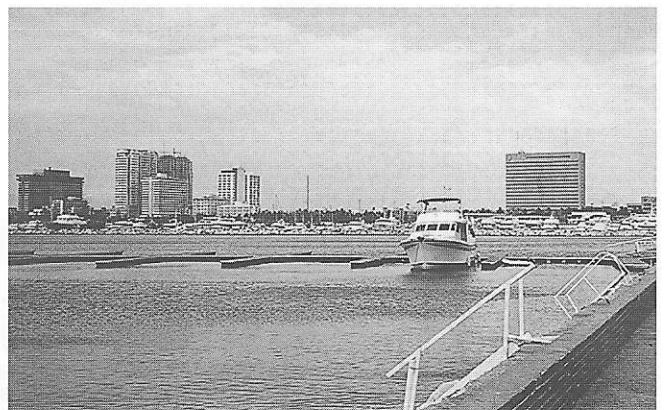

Signing the Minutes of Discussions of the Study

A Japanese Preliminary Study Team organized by the Japan International Cooperation Agency and headed by Mr. S. Kikuchi, Head of Cartographic Office, JHD, visited Manila, Philippines from 18 to 27 March 1998 for the purpose of clarifying the background and objectives of the request and also studying feasibility of Japanese assistance through discussions with the Philippine representatives headed by Com-

odore Renato B. Feir of the Coast and Geodetic Survey Department of the National Mapping and Resource Information Authority for the Technology Transfer Project concerning Production of Electronic Navigational Chart. During its stay, the Team had exchanged views and had a series of discussions with the Philippine representatives with respect to the implementation of the Project.
