

ENC Production in the D.P.R of Korea

In the IHO publication M-4(INT chart),it was committed to the D.P.R of Korea to produce the INT chart for the some sea areas in the East Asia (International Charting Region K).

The Hydrographic Department of D.P.R of Korea produced the ENC at the various scales for the sea areas in the Region K in accordance with the IHO TRANSFER STANDARD for DIGITAL HYDROGRAPHIC DATA.

As a result of ENC development from the early 1990's, the necessary problems such as production,quality control and updating were adequately resolved.

Produced ENCs are equivalent to the appropriate paper charts and therefor, meet the requirements stated in the SOLAS Convention, Chapter 5.

In future, we will develop the technical exchange and co-operation in the producing and use of ENC.

*Reportor:O Myong Chol,
Vice Director Hydrographic Department of D.P.R of Korea*
